

Building For Tomorrow - Construction Progress July-September

July 2008 (photo at left). Walls are complete, but no roofing has been started.,

August 2008. (photo at right), Trusses were installed roof sheathing and shingles all completed in the month between this and the previous photo.

September 2008 (photo at left). Stucco has been applied on the exterior walls, and the roof is essentially complete. From this point on, there will be little further change to the exterior of the building until paving and landscaping occurs. But much work is underway inside.
